

Installation React-Bootstrap

1. `pnpm install react-bootstrap bootstrap`.

2. check your `package.json` file in your project folder you will see as below:

```
```\n  \"dependencies\": {\n    \"bootstrap\": \"^5.3.3\",  
 \"react\": \"^18.3.1\",
 \"react-bootstrap\": \"^2.10.4\", <== You will see like this
 \"react-dom\": \"^18.3.1\"\n },
 ...
```

3. `import 'bootstrap/dist/css/bootstrap.min.css';` <== Copy this code and paste to your `main.js(main.jsx, main.tsx)` or `App.js(App.jsx, App.tsx)` in your project folder.

4. `import { Button, Col, Row, ..so on} from 'react-bootstrap';` <== use this code into your `App.js` file in your project folder when you use React-Bootstrap's `Button, Col, Row, etc...`
