How to create Vite + React project with pnpm package

1. **Create a New Vite Project**

   Copy code below and past into your folder path in termial

   ```
   pnpm create vite my-vite-react-app --template react
   ```

   Replace `my-vite-react-app` with your desired project name

2. **Navigate to Your Project Directory**

   ```
   cd my-vite-react-app
   ```

3. **Install Dependencies**

   ```
   pnpm install
   ```

4. **Start the Development Server**:
   To start the development server, run:
   ```
   pnpm run dev
   ```
   Copy your url => `http://localhost:3000`(don't copy not this url. this is for example). Paste to your browser to run your project
